*Featuring a wide variety
of business documents for
immediate shipment*

for use with impact printers

Mailer products provide an important business function allowing you to print both message and outgoing address in one pass. You also save time and money – no folding or stuffing is necessary – and you reduce inventory since envelopes are eliminated.

Rapid Impulse Mailers

RIM-101 – 9 7/8" x 5 1/2"

3 part, 1-way peel-apart mailer with hot spot carbon, red & grey graphics.

Packaged: 1500/carton **Weight:** 21#/thousand

3 part, 1-way peel-apart. Hot spot carbon, PMS red 185 graphics.

Packaged: 1500/carton Weight: 17#/thousand

CMS (Formerly known as HCFA)

Did you know the most widely used business form in the United States is the CMS 1500? In fact, anyone billing a health insurance company for products or services is required by the Centers for Medicare & Medicaid Services (formerly known as

Health Care Finance Administration) to submit a claim on a CMS-1500 form.

We offer a wide variety of government mandated and approved forms for the health care industry in cut sheet, continuous and unit set formats.

LAZERSTOCK™

Pre-printed check shells designed for use with non-impact technology. You can save time and money by imprinting variable information on these base stock products. Perfect for small accounts, you can reduce pre-printed inventories or utilize as fill-in orders. These generic forms can also be used as Direct Deposit Notices, rebate checks or coupons.

And since they are not personalized with MICR lines or bank information, they have no monetary value until you image them, reducing your chances of liability.

Checks In Top Panel

SECURITY GUARD™

All Lazerstock products include the following Security Guard.™ Features designed to add protection to your negotiable documents

- Specialty Papers:** These features include brownstain chemical reactants to detect attempts at erasure or chemical alterations, and invisible fluorescent fibers that are revealed under special "black lights."
- Void Pantograph:** The check background contains a pattern that reveals the word "Void" if attempts are made to copy this check on most copiers or scanners that are in use today.
- Warning Endorsement:** The standard endorsement backer alerts the receiver to check for the security features contained in the check to identify it as an original document. In addition, the endorsement lines are microprinted with the word "Security Guard" which is visible when properly magnified, but appears distorted if copied.
- Warning Band Border:** The border message alerts the receiver of the document to check for the Security Guard features contained in the check.

VERSASEAL®

Since 1996, VersaSeal has been the ideal print-to-mail solution for all types of business using non-impact technology. The system utilizes a pressure-activated adhesive so no glue, heat or water is needed. And because VersaSeal uses patented and proprietary glue patterns and chemistry, these products will perform flawlessly regardless of the printer or the folder sealer being used.

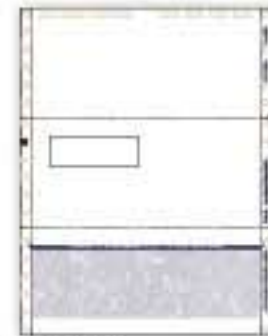

All of the products shown are ideal for small users, test runs, fill-in orders, or special applications.

All styles are shrink-wrapped in packages of 500 and packed 1,000 forms per carton. They are on the shelf available for immediate shipment.

Cut Sheet Window C-Fold Check- 8 1/2 x 11"

WC811B3 – 8 1/2" x 11" – Blue pantograph in bottom panel

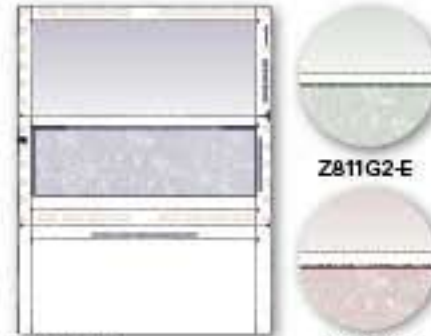

Prints on 28# MOCR bond designed specifically for use in pressure seal systems. Back printing includes an artificial watermark and REG CC backer. Bottom panel includes a hidden "void" feature design.
